Bus-Transfer from / to Hotel Maritim

### Conference & Exhibition

04<sup>th</sup> - 05<sup>th</sup> September 2018  
Maritim Hotel proArte  
Friedrichstraße 151  
10117 Berlin

The 2018 Conference is organized by:

# 4<sup>th</sup> International Symposium on Development of CBRN Protection Capabilities

03<sup>rd</sup> - 05<sup>th</sup> September 2018, Berlin

## Conference Ratio

The 4<sup>th</sup> International Symposium on Development of CBRN Protection Capabilities will take place in Berlin from 3 to 5 September 2018.

As in previous years, Germany will once again provide a professional platform for encounters and exchange of the international CBRN protection community. International experts will inform representatives from the fields of politics, administration, industry, academia, civilian and military organisations about latest developments in security policy and provide an up-to-date risk assessment with a view to chemical, biological, radiological and nuclear risks and the challenges they represent for military and civilian systems when it comes to hazard prevention. The list of international participants clearly indicates that protecting against the effects and impact of CBRN dangers is a top priority around the globe. As a result, CBRN continues to be in the focus when it comes to improving preventive security measures.

The repeated use of chemical weapons in conflict areas, the Ebola epidemic in West Africa, the Fukushima disaster and, last but not least, the international community's growing concern of the threat of nuclear terrorism in the light of the advancing proliferation of weapons of mass destruction are proof that CBRN protection within national and international security architectures remains relevant. In addition to the analysis of latest security developments, a special focus will be on presenting current conceptual foundations to meet the requirements of modern CBRN protection. Representatives from competent ministries and government authorities will explain the guidelines for the further development of CBRN protection.

Specific assessments by industry and academia will complement the

picture. The symposium will particularly focus on three relevant areas for development of CBRN protection:

National and international **cooperation** which need to be improved with the ultimate objective to establish a comprehensive network of CBRN protection capabilities. Taking into account recent developments within NATO and the EU, it is necessary to discuss the issue of **prevention** (averting hazard or damage situations in the first place) as the overriding principle when fulfilling CBRN protection tasks. At the same time, the efforts to create a resilient system, recognising its vulnerabilities, need to be discussed as well. **Resilience** is also key to increase survivability in general while preparing for damaging events that could not be averted. The citizens' preparedness and ability to contribute to their own protection (ability to help oneself), but also to endure possible damage without giving up the principles of the rule of law must be a central elements of any resilience strategy. This is particularly true in the case of stressful CBRN scenarios with a national dimension.

The symposium's aim is to inform participants about the importance attached to CBRN protection internationally and to discuss the way ahead. The plenary will debate political and strategic issues; technical and operational questions are discussed in expert panels. This year, the Federal Ministry of the Interior is in charge of the content of this high-level international conference, supported by the Federal Ministry of Defence, the Federal Office of Civil Protection and Disaster Assistance, the Bundeswehr CBRN Defence Command and the Association of the German Army. The event is organised by the Research Association of the German Association of Defence Technology.

## Call for Papers | Topics 2018

You are invited to submit your proposal for a speech or poster presentation (english, <= 250 words)

**not later than January 31<sup>st</sup>, 2018 to  
info@dwt-sgw.de**

that deals with the following topic/s:

- Risk and crisis communication
- Information and knowledge management
- Risk analysis / risk assessment
- Sensor integration
- Detection, identification, monitoring
- Decontamination and disinfection
- Countermeasures
- Individual and collective protection
- Education, training and simulation
- International and supranational collaboration
- Concepts and procedures
- Threat and society
- (Societal) resilience
- Psycho-social crisis management
- Arms control
- WMD disablement and prevention
- Innovation, research and development

"Your" topic is not listed above? Please feel free to submit your proposal anyway.

The programme committee will review the papers within 3-4 weeks, authors notification in March 2018. Speakers receive a 50% discount on the conference fee.

# 4<sup>th</sup> International Symposium on Development of CBRN Protection Capabilities

03<sup>rd</sup> - 05<sup>th</sup> September 2018, Berlin
